

Providing KML “Polygon” files for Alert

This document very briefly outlines how we would like to receive KML files for

- Each area will require a individual KML file.
- Please supply a structure as in the next slide with correct area names and beat names.
- We require the correct names for all areas and beats with the beat codes optional in brackets.
- Please ensure there are no “Islands” within the KMLs and each KML is a single polygon, not multiple polygons with gaps between them.

KML Structure
